College Profile

Kolandoto College of Health Sciences was established in 1957 known as School of Nursing and midwifery offering certificate of Nursing and midwifery. In 2012, it was registered as Kolandoto College of health sciences after introducing a department of Medical Laboratory and Clinical medicine, and thereafter Pharmaceutical Sciences were instituted with registration number REG/HAS/008. The college has been in the business of training of medical and health professionals for over 60 years. This has earned it an enviable position in Tanzania, East and Central African region. Most of its produce has excelled into super specialties serving in different position in the medical field.

The College has extended by opening new campuses as its Constituencies in Mwanza as **Kolandoto College of Health Sciences – Mwanza Campus** and in Simiyu as **Bishop Kisula College of health Sciences and Allied Sciences**. The College has experienced both exciting and challenging times but has set a pace for itself and the future is very promising.

Our Vision

To be a reputable College in health and allied sciences to meet national and international needs.

Our Mission

To provide high quality training, research and consultancy services in health and allied sciences. through efficient use of available resources to meet national and international needs.

Our Values

- Academic Diversification
- Commitment, Effectiveness and Efficiency
- Transparency and Accountability
- Integrity
- Continuous Learning
- Academic Excellence and Impact

Our Core Functions

The College of Health sciences is legally registered to deliver within the mandate of Ministry of Health and National Council for Technical Education and Training (NACTVET); teaching and learning, research and Consultancy service to community.

Teaching and Learning

In this area of strategic focus, the College runs several Ordinary Diploma Programs. We also run several short courses tailored to address specific needs of people working in the health sector. For more information about all our current programs please click the link www.kchs.ac.tz

Research and Innovations

Kolando College of Health Sciences works with both academic and other partners, both local and international. In a bid to conduct research that addresses actual needs of the community, the College goes through a process to set its research priorities that form the core of the research work carried out at the College, although other areas are also put in considerations.

Service to Community

The College Service to Community activities are conducted both as independently planned as well as, as part of research and teaching programs. These activities range from activities done by

students under the Community Based Education Research and Services; medication and health education provided as part of a research project.

Independently planned community service activities and projects range from a few days (medical/surgical camps) to several years (community health service projects).

Teaching and Learning Methods

Our teaching and learning methods seek to develop balanced professionals who will achieve personal as well as professional fulfillment at College, at work and in society at large. Our strong emphasis on self-directed study and research encourages individuals to maximize their potential and become problem solvers

We aim to build confident, pragmatic professionals, and to develop communication and leadership skills in our students who emerge as articulate young health professionals ready to contribute widely to the global community.

Teaching and Learning Facilities

The College has several facilities; physical, technological and human, that facilitate top-notch teaching, learning and research for the students. These include libraries and book banks, computer and internet hubs, laboratories, specialized equipment, content experts. Also The College has its own Teaching Hospital which is within the College compound (Kolandoto Council Designated Hospital) and Hospitals that in special memorandum of Understanding for being used as teaching hospitals. These include, Shinyanga referral Hospital, Kambarage Health Center, Mkula Council Designated Hospital, Simiyu Regional Hospital, Singida Regional Hospital, etc

College Prospective Plans

The College operates within the spectrum of well- established strategic plan that encompass the college Vision and Mission. Our prospective plans are well stipulated in the 2025/2026 - 2028/2029 College Strategic Plan.

The following is the highlight of KCHS- prospective plans.

- i. To increase the enrollment capacity by 25% from the current capacity.
- ii. To add two more programs namely Ordinary Diploma in Dentistry and Ordinary Diploma in Optometry by 2027.
- iii. To establish two more campuses in Arusha and Mbeya by 2029
- iv. The ultimate plan of the College is to advance to a higher learning institution (University) that offers a variety of degree programs in health and allied Sciences.
